Eco-Solar Home Tour 2020

Saturday 6 June, Noon to 4:30 pm

Frazer Vista NZE Home

Tour Day: Saturday 6 June

Address:

Hosts: Homeowner and Net Zero Developments

Parking: On Street

Energide Rating: 0 GJ/yr

Summary points why people need to see your home

- NetZero achievable on a large 4000 sqft+ home.
- To showcase the building strategy and technology required for energy efficiency and NetZero building.

What will people see and learn about at your home?

- What features support your Energide rating?
 - Air Source Heat pump for Heating / Cooling
 - Air Source Heat pump for Domestic Hot Water
 - Building and Envelope Air-Tightness
 - Exterior and interior rigid foam systems providing Thermal Bridge free design
 - Solar Photovoltaic Panels supplying annual energy demand

What are the main things people will see at your home?

- The mechanical room showcasing the high efficiency mechanical and plumbing equipment.
- Solar panel array covering the south facing roof pitch.
- High-efficiency appliances including induction cooktop.
- Triple-pane windows
- LED lights throughout.
- Energy Monitoring App.

Are there main items that they can't see?

- Air tightness, envelope seal and exterior foam
- Solar using 2string inverters
- Rigid foam under basement
- R80 blown insulation

Eco-Solar Home Tour 2020

Fraser Vista NZE Home

Why is this home on the tour?

An enthusiast that aims to educate the community on technology readily available to bring any size home to NetZero without breaking the bank.

What features save on energy costs?

- Airtightness and envelope seal ensure minimal heat losses
- Thermal Bridging is minimized
- Triple-Pane Low E windows
- Drain water heat recovery
- Air source heat pump heating
- Air source heat pump water heating

What features save on water costs?

- Drain water heat recovery
- Low Flow Faucets and toilets

Are there any other special features you want to highlight?

- Electric Car
- Electric Car Charger in garage
