Eco-Solar Home Tour -2018

Morinville NZER Home

Why is this home on the tour?

Placing this home on the tour to showcase a new energy efficient building block technology. Lightweight fire-retardant building block is competitive with wood frame building costs and provides an R60 building envelope.

What features save on energy costs?

- R60 wall and ceiling system
- Slab on grade (no basement)
- LED lighting throughout
- Efficient boiler with in-floor heat
- Custom made European windows
 - 3-pane & 1 laminated layer
- Even heat distribution and very little heat loss gives a very comfortable living space
